

Reddit API & NLP

Meggan Lanpher

Agenda

1. Problem Statement
2. Gather the Data
3. Explore the Data
4. Model the Data
5. Evaluate the Model
6. Answer the Problem

Problem Statement

Which Econ Is It?

Given the title and text of a submission, predict if it was posted to the subreddit r/AskEconomics or the subreddit r/askeconomists.

About the Subreddit Communities

r/AskEconomics

- “Ask questions of academic economists, so we can all know a little more about one of the most important forces in the human world, and be more educated citizens.”
- 27.8k Members - Created Mar 31, 2011

r/askeconomists.

- “A central repository for questions about economic theory, research, and policy. Please read the rules before posting.”
- 983 Members - Created Jan 9, 2013

Gather & Clean the Data

Reddit API requests

- `'is_self' : 'true',`
- `'subreddit' : 'AskEconomics', // 'subreddit' : 'askeconomists',`

NLP analysis of “selftext” and “title”

- Dropped rows with [removed] and [deleted] as the “selftext”

Cleaning with Stopwords

Added Stopwords

- Economics
- Econ
- Economy
- Economic
- Money
- Price
- Economist
- Market
- Cost
- Time
- Government
- Value
- Rate
- Does
- Question
- Ve
- Just
- Like
- make
- People
- I'm
- Good
- Work
- Know
- Year
